Subject: Goliad Project: Private Drinking Water Supply Wells

## Mr. Scott:

Here is the map you asked me about. It was provided to us by the president of the Goliad County Groundwater Conservation District, Mr. A. Dohmann. As you can see, it shows the location of private drinking water supply wells in the general area around the mining project, up to a distance of roughly three miles from the border of the permit area. I counted close to eighty wells.

As I have previously mentioned, I believe it prudent taking these wells into account in any modeling work for this area, given the high transmissivity of the aquifer. Unfortunately, the map does not have a legend, but it may be possible to obtain an explanation for the map symbols from the GCGCD. Please let me know if I can be of further assistance. Thanks,

JETorres 5-8092
